

2 Tenders should be presented in the prescribed form obtainable on payment of annas four per form from the Office of the Executive Engineer, Sagar Division, Sagar, in a sealed cover superscribing the name of the work tendered for. The name of the contractor should also be superscribed on the top of the cover.

3 Tenders to be quoted both in words and figures for individual items of works instead of quoting on percentage basis.

4 Each tender must be accompanied by a duplicate chellan for having credited into the treasury the required deposit amount under the "Revenue Deposits" or "Mysore Government Bonds" duly endorsed at full value or face value whichever is less as earnest money. Tenders not accompanied by the treasury chellan for having credited the earnest money will be rejected.

5 For lumpsum provisions for non-tendered items, the rate will be paid as per current minimum schedule in the case of scheduled items and rate with 10 per cent profit for items which do not find place in the schedule.

6 Plans and estimates and other particulars can be had for inspection in the Office of the Executive Engineer, Sagar Division, Sagar, on all working days between 2 P.M. and 5 P.M.

7 The successful contractor should bind himself to abide by the departmental rules in force and should execute the necessary "Mutchalika" within a fortnight from the date of receipt of intimation of acceptance of his tender, failing which his earnest money will be forfeited.

8 The final acceptance or recommendation for acceptance will rest with the Executive Engineer, Sagar Division, Sagar, who does not bind himself to accept the lowest or any other tender or to assign any reason whatsoever for the rejection of any.

9 No conditional clause will be accepted.

10 No sales-tax, octroi tax, or any other tax prevailing in the area will be admitted by the department.

11 No cheques will be accepted for the earnest money and no request for the adjustment of the amount due by the Government will be entertained.

12 The rates quoted will hold good for till the acceptance of the tender or otherwise by the competent authority.

13 The submission of a tender implies that he has read the notice and the conditions of the contract and has made himself aware of the scope and specifications of the work to be done and of the schedule of rates, etc.

14 If the work is not completed and handed over within the specified time, a fine of Rs. 50 will be levied for every fortnight's delay.

15 Tendered contractor has to pay compensation to the disabled workmen under him for any injury caused during the execution of the work, failing which the amount of earnest money will be deducted from the bill to be paid to the injured.

16 Sales-tax clearance certificate should be produced along with the tenders.

M. VIJAYADHWAJA RAO,
Executive Engineer.

Intending tenderers are requested to apply to the undersigned for copies of detailed notification.

1289

Notification dated 28th October 1953.

No. G.N. 71. The attention of the firms dealing in hardware materials is invited to this office Notification No. G.N. 71, dated 28th October 1953, inviting tenders for

the supply of Bolts a page 1422 of Part VI November 1953.

Intending tenderers at undersigned for copies of detailed notification.

1289a

Notification dated 9th

No. G.N. 72. Sealed tenders

Office of the Chief Electrical Engineer

Mysore, Bangalore, up to 3 P.M. on

for the supply of the following, the

being Ex-our C.P.S. Central Stores/I.O.

The tenderers should quote their best

should be firm for a period of one month

date of the tender. The rates should be quoted

words. The earliest period within which delivery would

be effected may be specified in the tender. Full specifications

regarding make, etc., should be specified in the

tender along with manufacturer's name, etc., complete.

Samples wherever possible should be sent for inspection.

The quantities in each item to be purchased may be

varied according to actual requirements at the time of

placing orders.

No enhancement of rates for whatever causes will be

allowed when once the quotation is accepted and order is

placed. Withdrawal from the quotation after it is accepted

or failure to make the supply within the scheduled

period will entail cancellation of the order and forfeiture of

the earnest money, if any. The successful tenderer,

should, if so required by us, should deposit a sum equal to

five per cent of the value of the order as earnest money

for the satisfactory execution of the order in accordance

with the terms and period of delivery specified in the order.

The Chief Electrical Engineer does not bind himself to

accept the lowest or any tender, but reserves to himself the

right to accept or reject any tender at his discretion.

Supply on our order will be subject to the general conditions

of contract prevailing in this department for local

purchases.

The tenders should be superscribed as "Tender for the

supply of Cable Fault Localising Equipment" to be opened

on 10th December 1953.

1. Induction type cable fault locator consisting of a well-designed electronic oscillator capable of giving a high frequency signal output at two or three selected frequencies, e.g., 1,000 or 1,400 or 1,800 cycles per second, equipped with amplitude control, 230 volts, AC 50 cy. mains unit, as well as alternative dry battery incorporated within the equipment, fuses, insulated leads indicating instruments, etc., complete. A portable receiver with external search-coil and headphones should also be provided. The equipment should be capable of locating faults in PILC steel-tape armoured 3 core 11 KV. power cables without the necessity for excavation, the cables running at a depth of 4 to 6 feet below ground. It should also be suitable for tracing the routes of unknown buried cables. One No.
2. High voltage type loop testing equipment suitable for locating high-resistance faults in the cables described under item 1 above. This equipment should include all necessary apparatus such as step-up transformer and rectifier, insulated resistance-bridge with protected galvanometer, H.T. voltmeter, etc., and should be suitable for breaking down and locating incipient high-resistance faults in oil-impregnated cables. The equipment should be designed so that absolute safety to the operator is ensured while using it and should be suitable for mains operation from 230 volts, 50 cy. AC supply and in case of power failure operative from Dry cells. One No.

Note.—The tenders should be accompanied with illustrated descriptive literature giving full technical particulars for both the above items; Otherwise, no tender will be considered.

N. D. M. APPA,
For Chief Electr. Engr.
